

Creditron's 2018 Users Conference to be Held in Toronto, Ontario

Creditron, a leading provider of integrated receivables and cash application solutions, announced that it will be hosting its 2018 Users Conference in Toronto, Ontario, Canada. The dates and venue will be announced in the next few weeks. The annual user's conference is a valued tradition and an integral part of Creditron's commitment to delivering superior results through exceptional customer responsiveness and support.

Creditron held this year's conference in downtown San Francisco and it was a terrific success. The agenda was spread over two days to include three customer case studies, vendor panels and various other breakout sessions discussing a host of topics. The sessions were informative and the speakers clearly articulated their take on things. Topics such as the latest initiatives by the Federal Reserve, the changing scanner marketplace and the rise of electronic payments were all met with great interest.

We plan to build on the success of this year's conference to again connect Creditron customers, business partners and our technical subject matter experts in order to provide a platform for them to exchange ideas and best practices that can help improve business outcomes and achieve organizational success.

Here is what some of our 2017 Users Conference attendees have said about their experience, *"The Creditron conference brings all users together for a wonderful two day interactive, knowledge sharing session. We all leave feeling like family."* – Fortune 250 Insurer

"The conference was very good and nicely presented. I enjoyed the breakout lunch session with each other about processes changes, ideas and questions. Session were very well put together and knowledgeable. The evening event was very nice and the Creditron team was outstanding." – Oblate Mission

"Very informational, great networking event and overall great conference!" – Greystone Power

The benefits of sharing thoughts and ideas with industry peers and Creditron's subject matter experts is invaluable. The 2018 conference will provide another such platform with interactive sessions where attendees will have the opportunity to share the innovative ways they are using their current solutions as well as learn about new technologies and developments.

Stay tuned to www.creditron.com for details on next year's conference. We hope to have you join us!
