

## ControlScan Partners with FIS to Streamline Payment Facilitators' PCI Compliance

### Two leaders in payment facilitator services—ControlScan and Worldpay from FIS—join forces to reduce security risk in the payments chain

ATLANTA, GA - [ControlScan](#), a leader in managed security and compliance solutions that help secure IT networks and protect payment card data, has been selected by FIS' merchant services division, Worldpay from FIS<sup>1</sup>, to provide services that will help reduce payment security risk for [payment facilitators](#) the company serves.

As a payment service provider for its payment facilitator clients, FIS will employ ControlScan's platform to assist payment facilitators on the path to compliance with the Payment Card Industry Data Security Standard (PCI DSS). ControlScan's platform enhances the Worldpay from FIS solution suite to simplify the complexity and increased scope of compliance inherent in the payment facilitator business model.

"Payment facilitators provide a valuable service within the payments chain, but there can be security-related risks inherent in that model," said Nicole Jass, senior vice president of product, merchant services, FIS. "We are partnering with ControlScan to proactively address those risks and deliver a platform to our payment facilitators that is specific to their method of payment acceptance."

Through the new partnership, payment facilitators using Worldpay from FIS solutions can leverage the customized ControlScan platform to put their sub-merchants on a path to compliance with PCI DSS. Payment facilitators can also take advantage of ControlScan's PCI Qualified Security Assessors (QSAs) to conduct a formal IT risk assessment as well as become ControlScan certified as a PCI DSS Level 1 Service Provider.

When payment facilitators take advantage of this offering, payment security risk can be reduced at multiple points in the payments chain. The payment facilitator and the end merchant will both benefit from an increase in compliance and a decrease in risk.

"In recent years we've seen aggressive growth in the payment facilitation segment of the payments industry," said Matt Loos, executive vice president of business development, ControlScan. "We are excited to partner with FIS and are looking forward to guiding payment facilitators through a best-practices approach for maintaining their own compliance and security, as well as that of their sub-merchants."
